

Experiencing Labour Shortages?

Attend an Information Session on Recruiting Employees from France

Presented by Alberta Employment, Immigration and Industry

The Alberta government is hosting information sessions in Calgary and Edmonton for employers interested in recruiting foreign workers from France. Representatives of Espace Emploi International, France's national employment agency, will be on hand to help employers fill their mission-critical jobs and provide information on the current labour market in France. There is a large pool of skilled workers available to hire immediately in the agriculture and technology sectors, trades and professional occupations.

Espace Emploi International (EEI) facilitates international recruitment and provides a variety of services for international employers who would like to advertise jobs and hire qualified French workers.

You must pre-register by contacting:
