

Dear Sir/Madam,

I wish to apply for a Working Holiday Visa for Japan.

I am particularly fascinated by traditional Japanese arts, such as tea ceremony and calligraphy, society, and daily life through an extended stay in the country. During my previous short visit to Japan in November 2025, I was able to experience everyday life in Kyoto and Osaka. I also had the opportunity to communicate in Japanese with local people, which helped me to improve my Japanese significantly. This experience confirmed my desire to return to Japan for a longer period and immerse myself more deeply in Japanese culture.

Through the Working Holiday program, I hope to deepen my understanding of Japanese culture, customs, and way of life by traveling to different regions of Japan and interacting with local people. I am particularly interested in experiencing daily life beyond typical tourist environments, including living in shared accommodation and working in various environments.

During my stay, I plan to finance my trip through personal savings and temporary employment, while remaining flexible regarding the type of work depending on opportunities available. I have been studying Japanese and would like to use my time in Japan to put what I have learned into practice. Everyday situations as shopping, travelling, communicating with my host and interacting with local people will allow me to develop my conversational skills naturally

I believe that this experience will be a valuable personal and cultural opportunity, allowing me to develop independence and adaptability while gaining a deeper understanding of Japanese social norms and daily life.

I would be honored to participate in the Working Holiday program, which I believe will provide a deeply enriching personal and cultural experience.

Yours faithfully,

Erwan Alexandre Le Roux
